Week Ending: October 12, 2003 Released: 3:00 p.m. MDT October 14, 2003

Harvest Winding Down

Agricultural Summary

Harvest activities are winding down across the state as favorable weather conditions continued. Onion harvest is done, while dry bean, corn for silage, and hay third cutting harvest near completion with only minor acreage left to be harvested. For the week ending October 12, major agricultural activities included irrigating, caring for livestock, harvesting hay, dry beans, apples, potatoes, corn for silage and grain, onions, sugarbeets, and winter wheat seeding.

Soil Moisture and Days Suitable for Fieldwork

County Extension Educators reported topsoil moisture to be 36% very short, 43% short, and 21% adequate. Statewide, Idaho farmers had an average of 6.90 days suitable for fieldwork during the past week.

Crop Progress Table

Percentages	2003	2002	Avg.
Dry Beans Harvested	99	99	96
Onions Harvested	100	98	86
Apples Harvested	47	41	45
Field Corn Harvested for Silage	96	91	89
Field Corn Harvested for Grain	22	4	15
Alfalfa Hay 4 th Cutting Harvested	83	84	72

Field Crop Report

Recent rains in North Idaho have been beneficial for crop germination and growth. Winter wheat planting in North Idaho has progressed ahead of last year and the five year average, while emergence lags slightly behind normal. Above normal temperatures continued throughout the state this past week providing farmers excellent conditions for harvest and fall seeding. Idaho's apple harvest progressed to nearly half complete this past week, ahead of last year and the five year average.

Livestock, Pasture and Range Report

Ranchers continue to pregnancy check, wean, vaccinate and market livestock as they are moved to fall pastures. Range and pasture remain in mostly poor to fair condition.

Condition Table
